Slime:

Pour out the entire contents of a 4oz of Elmer's school glue into the bowl. Add ½ TBSP of baking soda and mix. After mixing, add your choice of food coloring and mix. Add 1 TBSP of Contact solution. Mix until slime forms and it begins to get harder to mix. Take the slime out and begin kneading with both of your hands. Get ready to make batch after batch, slime is addicting! ***If needed you can always add ¼ TBSP Contact solution to make the slime less sticky.

Bin or Container Snow Fun!

Got snow but want to be warm inside? No problem! Just fill a sensory bin or container with the snow from outside. Once inside, there are so many ways kids can play and explore with the snow!

***Add scoopers and other kitchen gadgets for a bit of simple exploration.

***Give kids spray bottles of colored water so that they can **paint the snow**. Mix 5-10 drops of food coloring with water in spray bottles and you will have vibrant **snow paint!**

***Paint brushes and colored water make for another fun way to PLAY. Just use containers to mix the food coloring & water instead of spray bottles.

***Sand toys are great for use in the snow. Add a few to the bin and kids will have lots of fun digging, scooping, and building **snow castles**.

***Play with cars and trucks in the snow.

***Make Mr. Potato Heads! If you have potato head parts at home, add them to your bin of snow. Kids will have a blast making **silly snowman heads!**

During winter fill balloons with water and add food coloring, once frozen cut the balloons off & they look like giant marbles or Christmas decorations.
